**DETAILED ACTION**

***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention: 1) the following species of layer configurations: the species of Figure 21, the species of Figure 22, the species of Figure 23 or the species of Figures 28 and 35. If one of the layer configuration species of Figures 21-23 is elected, then a) the following species of minisheet configurations: the species of Figures 15 and 26, the species of Figure 16, the species of Figure 27 or the species of Figures 32-34 and b) the following species of packaging configurations: the species of Figure 17, the species of Figure 18, the species of Figure 19 or the species of Figure 20. If one of the minisheet configuration species of Figures 15 and 26, 16, or 27 is elected, then c) the following species of pull up body configurations: the species of Figures 1a-1b, the species of Figures 3-5, the species of Figures 6-7, the species of Figures 8-9, the species of Figure 10, the species of Figure 11, the species of Figure 12, the species of Figure 13, the species of Figure 14 or the species of Figures 29-30. If the layer configuration species of Figure 28 and 35 is elected, then d) the following species of minisheet configurations: the species of Figure 28 or the species of Figure 35.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from 1) and from each of a)-c) or d), if applicable, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

For example Applicant might elect the layering configuration of Figure 21, the minisheet configuration of Figures 15 and 26, the packaging configuration of Figure 17, and the pull up body configuration of Figures 1a-b and list the claims readable thereon.

2. A telephone call was made to Mr. Mizumoto on 4-29-05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karin M. Reichle whose telephone number is (571) 272-4936. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Larry Schwartz can be reached on (571) 272-4390. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
